Factors Related to the Level of Compliance with Pulmonary TB Treatment <i>Endang Martini, Rika Sarfika, Siti Yuliharnim</i>	155-176

It is with great enthusiasm that we introduce the Asian Journal of Healthcare Analytics (AJHA), a platform dedicated to the dissemination of high-quality research, innovative practices, and critical insights within the realms of healthcare analytics, medicine, nursing, and the broader healthcare sciences. The journal serves as a bridge connecting researchers, practitioners, and academicians from across the globe, fostering a collaborative exchange of knowledge and ideas.

Healthcare is a dynamic and rapidly evolving field where data-driven approaches and analytics play a pivotal role in improving patient outcomes, optimizing healthcare systems, and addressing the complexities of global health challenges. AJHA aspires to be at the forefront of these efforts by publishing peer-reviewed articles that include original research, review papers, case studies, and interdisciplinary studies. By doing so, the journal seeks to deepen the understanding of healthcare experiences and promote the application of innovative methodologies.

We extend our gratitude to the contributors, reviewers, and the editorial board, whose expertise and dedication make this publication possible. As we embark on this journey, we invite readers to explore the diverse content of this journal, which is designed to inform, inspire, and enrich the professional practices of healthcare stakeholders.

Published biannually, AJHA remains committed to upholding the highest standards of academic integrity and promoting meaningful contributions that can shape the future of healthcare analytics. We encourage scholars and practitioners to join us in our mission to advance the field and enhance the global impact of healthcare research.

Happy Reading

Professor Jen Peng Huang, Ph.D
Editor-in-Chief
